EDUCATION

- **Gargi Memorial Institute of Technology** Kolkata, India
B.Tech in Computer Science Engineering; GPA: 8.5 Aug. 2019 – Aug. 2023
- **Indian Institute of Technology** Guwahati, India
Advanced certification in Applied Data Science, Machine Learning and IoT Jan. 2025 – Mar. 2026

EXPERIENCE

- **Informaticae Technology Pvt. Ltd.** Kolkata, India
Senior Software Engineer Jan 2024 - Present
 - Built an AI-driven Teacher Module in Power School AI that automated assignment generation and academic workflow management, achieving an 85% reduction in manual preparation effort.
 - Improved performance, code quality, and system reliability through optimization and reviews.
 - Mentored junior developers and collaborated closely with cross-functional teams.
 - Built a dynamic assessment configuration module for Power Schools, supporting multi-level difficulty, multi-language and multi-type question selection, customisable question counts, and weighted scoring logic.
 - Developed automated answer checking and student performance analytics within Power School, reducing grading time by 80% and significantly improving academic performance tracking.
- **Informaticae Technology Pvt. Ltd.** Kolkata, India
Software Engineer August 2023 - Dec 2024
 - Built RESTful APIs using FastAPI for the hello-teacher.ai platform to support scalable frontend-backend interactions.
 - Implemented secure, scalable, and efficient API endpoints for user authentication, subject management, teacher assignments, and model question workflows.
 - Reduced API response time by 50% by optimizing SQL queries, indexing, and caching strategies.
 - Implemented secure authentication and authorization (JWT, OAuth) for user management and data protection.
 - Worked with CI/CD pipelines and Dockerized deployments to enable continuous integration, automated testing, and seamless deployment of Python applications across environments.
- **Runtime Solutions** Kolkata, India
Backend Developer Intern March 2023 - August 2023
 - Built scalable web applications using Django and Flask, focusing on performance, security, and maintainability.
 - Designed and optimized relational database schemas, improving query execution speeds.
 - Implemented caching mechanisms (Redis) to enhance response times for frequently accessed data.

PROJECTS

- **Candidmen- ecommerce** Tech stack- Django, DRF, PostgreSQL, Redis, Docker, AWS
Developed RESTful APIs for user authentication, product management, order processing. Optimized SQL queries, reducing API response time by 50% and improving search functionality. Implemented payment gateway integration (Razorpay), handling secure transactions.

PROGRAMMING SKILLS

- **Languages:** Python, Javascript, HTML/CSS, SQL, Java
- **Tools and software:** AWS, Git, Docker
- **Frameworks:** Django, Flask, FastAPI, React
- **Libraries:** Pandas, NumPy, Matplotlib, TensorFlow, Pytorch
- **Data visualisation:** Tableau, Power BI
